

ENSITECH QUALITY POLICY

Ensitech Pty Ltd is the designer and developer of the TIG Brush® Metal Cleaning System that is manufactured in NSW, Australia. Ensitech manufactures its products for sale across Australia and the rest of the world.

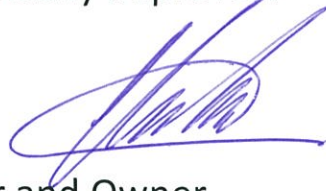

Ensitech is committed to providing the highest quality of goods, services and solutions for all its customers, and one which meets all Statutory and Regulatory requirements, wherever they may be.

To achieve this goal, management and staff have instilled a culture of continual improvement within the organization by adhering to the principles of ISO 9001:2016, regularly reviewed by an authorized auditing body.

Ensitech's Quality Management System is constantly Monitored and improved by utilizing Strategic Planning activities. Procedures have been developed in accordance with these strategies to allow any individual to improve the system.

Management communicates with staff and suppliers to set appropriate Quality Objectives, which are periodically reviewed for their effectiveness and suitability. The results of reviews are shared with all stakeholders, so that the effectiveness of the Quality Management System continually improves.
